THE YOUTH FOR A SAFE INTERNET SPACE!

THE INTERNET IMPOSED NEW CHALLENGES TO YOUTH AND SOCIETY

The internet creates addiction and mental health issues and makes the young people estranged and asocial.

User's data safety on the platforms, possible predators and paedophiles' attacks.

Misleading perceptions and false opinions about young people.

Weak personal data protection allows for misuse and violation of privacy, identity theft and plagiarism of academic research.

Spread of hate speech and cyber bullying, including backlash and towards the student activist.

Political propaganda is enabled trough fake news.

These conclusions and recommendations are based on the findings from the youth consultation event designed to understand the youth personal experiences on the internet, both positive or negative, and their opinions on what policy actions and which stakeholders should be implementing these actions to improve the users experience.

The youth consultation events are part of the project "Make Future Together: EU and the Western Balkans from the Youth Perspective", financed by the European Agency for Cultural, Educational and Audio-Visual Policies through its Europe for Citizens programme.
